## CLAIMS

1. An oil-in-water type emulsion for light-exposing food comprising fat and nonfat milk solids, wherein the fat consists of non-milk fat, or non-milk fat and milk fat; the non-milk fat has such a constituent fatty acid composition that the total amount of lauric acid and palmitic acid is not less than 40%, the total amount of oleic acid, linoleic acid and linolenic acid is not more than 50%, and the total amount of linoleic acid and linolenic acid is not more than 5%; and the ratio of milk fat/total fat is not more than 0.95.

- 2. The oil-in-water type emulsion according to claim 1, wherein the oil-in-water type emulsion further comprises at least one ingredient selected from tocopherol and rutin.
- 15 3. The oil-in-water type emulsion according to claim 1 or 2, which is for photodegradation-resistance.
  - 4. The oil-in-water type emulsion according to any one of claims 1 to 3, wherein the oil-in-water type emulsion is whippable.
- 5. A method for preventing photodegradation of an oil-in-water type emulsion comprising fat, nonfat milk solids, water and an emulsifier, which comprises:

using as the fat that consisting of non-milk fat, or non-milk fat and milk fat, wherein the non-milk fat has such a constituent fatty acid composition that the total

amount of lauric acid and palmitic acid is not less than 40%, the total amount of oleic acid, linoleic acid and linolenic acid is not more than 50% and the total amount of linoleic acid and linolenic acid is not more than 5%; and the ratio of milk fat/total fat is not more than 0.95.

5

- 6. The method according to claim 5, wherein the oil-in-water type emulsion further comprises at least one ingredient selected from tocopherol and rutin.
- 7. The oil-in-water type emulsion according to claim
  1, wherein the fat is non-milk fat and the emulsion is a
  nonfat milk solid-containing oil-in-water type emulsion
  comprising 1 to 12% by weight of fat and 3 to 26% by weight
  of nonfat milk solids; and the non-milk fat has such a
  constituent fatty acid composition that the total amount of
  lauric acid and palmitic acid is not less than 40%, the
  total amount of oleic acid, linoleic acid and linolenic
  acid is not more than 50% and the total amount of linoleic
  acid and linolenic acid is not more than 5%.
- 8. The oil-in-water type emulsion according to claim
  7, wherein the nonfat milk solid-containing oil-in-water
  type emulsion further comprises tocopherol.
  - 9. The oil-in-water type emulsion according to claim 7, which is an emulsion for blending use.
- 10. The oil-in-water type emulsion according to claim7, which is an emulsion for blending into pudding, bavarois

or jelly.
